

What Erasmus Mobility Taught Me

Taking part in the Erasmus mobility program was one of the most valuable experiences in my life. During my trip to Frankfurt and Strasbourg, I learned much more than I expected. It was not only about traveling and visiting new places, but also about understanding different cultures, meeting new people, and seeing Europe from another perspective.

In Frankfurt, I had the opportunity to visit important European financial institutions connected with the functioning of the European Union. Seeing these places in real life helped me understand how international cooperation works and how important these institutions are for European countries. I also explored the city itself, which impressed me with its modern atmosphere and organization. What I appreciated the most, however, were the conversations with German people. Thanks to them, I could learn more about their mentality, lifestyle, and the way they look at the world. It showed me that even though we come from different countries, we often share similar values and goals.

The second part of my Erasmus experience took place in Strasbourg, where I had more time to fully experience everyday French life. I talked to many people, discovered local traditions, and observed how the French enjoy their daily routines and social life. This taught me to appreciate cultural diversity and to be more open-minded. Strasbourg also gave me the chance to visit the European Parliament and other European institutions nearby. It was inspiring to see places where important decisions for Europe are made. I realized how important communication, cooperation, and mutual respect are in international relations.

Erasmus mobility also helped me improve my social and communication skills. I became more confident speaking with people from different backgrounds and more independent while traveling and adapting to new environments. I learned that stepping outside my comfort zone can lead to unforgettable experiences and personal growth.

Overall, Erasmus taught me openness, independence, and a broader understanding of Europe and its cultures. It was an experience that changed the way I see the world and helped me grow both personally and academically.
